

APPENDIX H
TRANSPORTATION SYSTEM PLAN

APPENDIX H TRANSPORTATION SYSTEM PLAN

Issues discussed by the Planning Commission and the Periodic Review Advisory Committee in order of discussion.

1. Concern with the riparian area at the Applegate Bridge area. Consider installation of a traffic signal at 26th Street before building the bridge.
2. Consider not painting a bike lane stripe on Southwood Drive and S. 30th Street for the following reasons: the hills and curves are hazardous for driving; parking on both sides of street; low volume bicycle traffic.
3. Consider eliminating truck traffic on S. 19th Street, or granting local use permits. Concern with additional traffic at the primary school location.
4. Prefer couplet cross over from Applegate to Main Street be contained within 14th and 15th streets (the map in the Plan seems to depict a two block area).
5. Urge the Council to begin acquiring properties for the eventuality of a couplet.
